

MEA CULPA

In the last issue of *Harvard Papers in Botany* (volume 26, No. 2), a correction sent to the editor for Tahil (2021) was somehow overlooked, and a mistake appeared on page 472, in the legend of Figure 1 (“... **A**, plant showing a branch with leaves **and and** inflorescences...”). The editor apologizes to the author in question and to the readers for this oversight.
