

*NOTULA* ~ ON THE HOLOTYPE OF  
*CARPOTROCHE CACERESIAE* (ACHARIACEAE)

ALEXANDRE K. MONRO<sup>1</sup> AND DANIEL SANTAMARÍA-AGUILAR<sup>2</sup>

Kanchi Gandhi pointed out that, when publishing *Carpotroche caceresiae* D. Santam. (Santamaría-Aguilar et al., 2021), we inadvertently cited two series of numbers for the holotype, without indicating that one of them corresponded to the image barcode (5989394), and one corresponded to the accession number at MO (MO5989394); the citations of these two numbers may have created some confusion. We herein clarify that both numbers referred to the same herbarium sheet.

LITERATURE CITED

SANTAMARÍA-AGUILAR, D. I. M. CORONADO, R. L. LIESNER, AND A. K. MONRO. 2021. A New Species of *Carpotroche* (Achariaceae) from Honduras and Nicaragua. *Harvard Papers in Botany* 26, No. 2: 455–469.

Thanks to Kanchi N. Gandhi (GH) for bringing this oversight to our attention.
